

International Symposium on Neonatal and Pediatric Transfusion

Know our International Speaker

Dr Simon Stanworth

Consultant Haematologist at the John Radcliffe Hospital

Professor of Haematology and Transfusion Medicine, University of Oxford, UK

- Trained in pediatrics and hematology. Consultant Hematologist at the John Radcliffe Hospital in Oxford (NHSBT and Oxford University Hospitals Foundation Trust).
- **Director** of the NIHR Blood Transfusion Research Unit (BTRU) Data Enabled Transfusion Practice, focused on new data and methods for assessing and improving transfusion practices.
- **His research** is driven by patient needs, identified through multiple Patient and Public Engagement panels and works with James Lind Priority Setting Partnerships.
- **Main research goal:** To understand which patients need (or don't need) blood or alternatives to blood transfusion.
- **Interest** in translating research into practice through studies on audit & feedback and by contributing to national and international guidelines, such as recent work on red cell transfusion thresholds and platelets.
- **National and international leadership roles in transfusion medicine**, including:
 - ✚ Chair of the former National Cancer Research Institute UK Supportive Care Working Party
 - ✚ Chair of the European Hematology Association Transfusion Specialist Working Party
 - ✚ Chair of the International Collaboration for Transfusion Medicine Guidelines
 - ✚ Co-Chair of the Biomedical Excellence for Safer Transfusion Collaborative (BEST)

Join us for the symposium on 21st December 2024.
